

Unit: Tech Then and Now

Focus on Speaking

Deliver Presentations p.80 in text

Great presentations come from a combination of important content and powerful delivery.

Presentation tips:

1. **Start your presentation in an engaging way.** For example, make your audience become personally connected to your topic.
2. **Use a language style that engages your audience.** For example, if you are speaking with a group of teens, you want to use informal language and words that they will understand.
3. **Make the organization of your thoughts clear.** Tell your audience early on, and in a clear way, what your message is about.
4. **Have passion, and energy and conviction in your voice.** If you are excited about your topic then your audience will become excited about your topic as well.
