

## Art & Design 3200: Pen and Ink Project

This project gives you a chance to use a unique drawing material to which many of you are not familiar.

Ink is used by many Art Professionals. Comic book artists, Calligraphers, architects, fashion designers, animators, tattoo artists, all use the medium of ink.

In this project, you will create an original Ink drawing that is full of patterns, shapes and design that reflect a chosen theme.

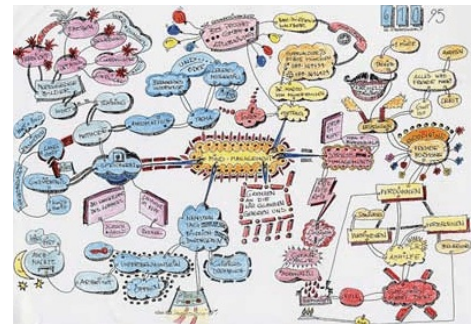

James Ritchie, pen and ink on paper, spring, 2004.

### Be Creative:

This project is all about the creative process: brainstorming, idea selection, composition, and final product. Complete the following in your sketchbooks. This process is worth 50 % of your project mark.

**Brainstorming:** Pick a theme (school subject, favorite activity/movie/band) Create a concept map like the one on the right using words that go with your theme. You should aim for a minimum of 30 words.

**Idea Selection:** Indicate which ideas that you will use for your project. Circle the best ones or cross out the bad ones. Try to combine some of the ideas together.

**Composition:** Make at least three composition sketches of your idea. Draw a frame first and then draw the major elements inside. These do not have to be very detailed but they should be used to experiment with different viewing angles and arrangements of the elements.

**Rough Sketch:** You will show me your three sketches and we will select your strongest composition. You will begin drawing this design in pencil on the final project paper.

**Final Product:** Once everything is penciled in, you may begin inking in your design.

### Evaluation:

- Brainstorming Map..... 5 points
- Three sketches ..... 5 points
- Creativity of final product..... 5 points
- Craftsmanship..... 5 points
