

Chemistry 2202
Outline and Evaluation
2009-2010
Mrs. Ruth Simmons

Unit	Number of Cycles	Completion Date
1 Review of Nomenclature and Reactions	2.5	September 30
2 Stoichiometry	10	January 29
3 From Structures to Properties	6	April 1
4 Organic Chemistry	6	June 4

Evaluation Scheme

Type of Evaluation	Value
Tests	30
Assignments/Quizzes	15
Labs/STSEs	10
Midyear Exam	15
Final Exam	30

Expectations:

1. **Students doing Chemistry 2202 are expected to have a good working knowledge of all aspects of the chemistry section of Science 1206. Classes in September will review those concepts very quickly. STUDENTS IN LEVEL I DOING SCIENCE 1206 AND CHEMISTRY 2202 CONCURRENTLY ARE EXPECTED TO COME FOR HELP AFTER SCHOOL TO GIVE THEM THE NECESSARY BUILDING BLOCKS FOR THE COURSE. This also applies to students in Level II that did not do well in the chemistry section of Science 1206.**
2. **Students are RESPONSIBLE** for work that is missed when you are absent, for any reason. The student is required to find out what was missed on his/her time from a classmate, do any required work and submit in a timely fashion.
3. Assignments, lab reports, and STSEs are designed for individual completion. Commonalities will be considered cheating/plagiarism and subject to penalty.
4. Menihek's "Second Chances" policy will apply to evaluation pieces, provided the student is willing to put in the extra work and time required to improve the mark they want to replace. Students must also request a second chance in a timely manner.
